DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen (US PAT. 5,974,333).

Consider claim 1, Chen teaches a support base comprising: a housing including an upper portion having an opening formed therein, a circuit board received in housing (col. 2 lines 10-17), a cap pivotally secured in housing, and movable to selectively enclose opening of housing (see fig. 8 col. 5 lines 50-63) and a wireless transmission device including a first coupler engageable into opening of housing, and engageable with circuit board (col. 2 lines 18-32).

Consider claim 2, Chen further teaches housing includes a channel formed in upper portion thereof and communicating with opening of housing, to receive first coupler of wireless transmission device (see fig. 8 col. 5 lines 50-63).

Art Unit: 2618

Consider claim 3, Chen further teaches housing includes a pair of tracks provided therein to define channel, and to receive first coupler of wireless transmission device (see fig. 6 col. 5 lines 3-9).

Consider claim 4, Chen further teaches housing includes a peripheral flange to define opening thereof, and cap includes a peripheral shoulder formed therein to receive peripheral flange of housing (col. 5 lines 50-63).

Consider claim 5, Chen further teaches biasing cap (see fig. 8 item 8) to enclose opening of housing (col. 5 lines 50-63).

Consider claim 6, Chen further teaches a bracket (item 1) attached to bottom of housing, for securing housing to vehicles (see fig. 1 col. 1 lines 14-25).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (US PAT. 5,974,333) in view of Schlegel (U.S PUB. 2004/0097274).

Consider claim 7, Chen teaches a support base comprising: a housing including an upper portion having an opening formed therein, a circuit board received in housing (col. 2 lines 10-17), a cap pivotally secured in housing, and movable to selectively enclose opening of housing (see fig. 8 col. 5 lines 50-63) and a wireless transmission device including a first coupler engageable into opening of housing, and engageable with circuit board (col. 2 lines 18-32).

Chen does not explicitly show that circuit board includes a second coupler provided therein, for engaging with first coupler of wireless transmission device.

In the same field of endeavor, Schlegel teaches circuit board includes a second coupler provided therein, for engaging with first coupler of wireless transmission device (page 4 [0039]).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use, circuit board includes a second coupler provided therein, for engaging with first coupler of wireless transmission device, as taught by Schlegel, in order to provide operation of mobile telephones in motor vehicles serve as holding mechanically receiving mobile telephones and have a large number of functions for enhancing vehicle safety and operational comfort and convenience.

Consider claim 8, Schlegel further teaches housing includes a third coupler (item 12a) provided therein (page 5 [0043]).
